	TO DO	IN PROGRESS	COMPLETE		
Satoshi			Task 1: Make sure that when the user logs in, all		
			session data has bee cleared and the website is reinitialized		
			Task 2: Make sure that the clearing occurs when the user logs out		
			Task 3: Add an algorithm to hash and unhash the users passwords so that they are not stored as		
			plain text in the firebase database		
	Task 4: Add test to ensure that the logout button is working and existent on all pages		Task 5: Make sure that the accurate page is loaded when the user enters the website		
			(localhost8080).		
			Task 6: Add search input error alerts in java on all pages (home, vacation, activity).		
			Task 7: Make sure user stays logged in unless they log out		
			Task 8: Redirect logged in user to homepage when visiting login/sign up page		
			Task 9: Make sure that the password fit the		
			minimum 6 character requirement from firebase Task 10: Change uid from email to actual user id		
		Task 11: Add SSL/HTTPS to the website for	stored in firebase		
	Task 12: Fix activity page (limited activities, temp unit conversion?)	security			
	Task 13: Look into temp unit for activity/vacation and fix bug Task 14: Save email in session				
	Task 15: Write acceptance tests				
Alex					
	Task 1: Make sure that the favorites list size remains the same on the analysis page when the user logs out and logs back in again				
	Task 2: Check that when a new user logs in their search history is there	Task 3: Check that if the user has signed up for the			
		Task 3: Check that if the user has signed up for the first time, there should be no search history, favorites, etc.			
		Task 4: Test that the website reinitializes when a new person logs in			
		Task 5: Check that the proper favorites list loads on the analysis page when a new user logs in			
			Task 6: Check that you can add and remove from		
			the favorites on the analysis page, and that it updates in the firebase for users likes, as well as updates the buttons on vacation and activity, and		
		Took 7: Chook that -ddid	finally updates the total like count in the database		
ĺ		Task 7: Check that adding and removing from favorites on the vacaton and activity page, not only updates analysis page, but updates user info in			
		updates analysis page, but updates user into in firebase, and updates total likes			
		Task 9: Write acceptance tests in accordance with	Task 8: Write unit tests for the favoriting system		
		the acceptance test document	Task 10: Implement the liking system. Since we		
			were unable to gain feedback we will implement this to the best of our knowledge, and add		
			acceptance tests to show how this works		
John					
			Task 1: Change the format of the search history page		
			Task 2: Instead of having a seperate search history page, make sure that it is the last 4 most recent		
		Task 3: Add acceptance tests for the search	searches and is only present on the homepage.		
		history, outlined in the acceptance test document Task 4: Make sure that the searches added are			
		only valid searches	Task 5: Make sure that the searches added are		
			unique to each user		
	Task 6 Add extensive acceptance tests for the radius search field, outlined in the acceptance test document				
ĺ			Task 7: Remove the num results field from both the activity and vacation page and make sure that it is		
		Task 8: Work with Lauren to do the UI on the	updated in the back end		
	Task 9: Once the liking functionality is integrated between the front and back end, add the sorting algorithm to the activity and vacation page, for the likes	homepage for the Search History			
	the sorting algorithm to the activity and vacation page, for the likes		Task 10: Check If new user, no prior searches		
		Tack 11: Check that if only approhad once there is			
		Task 11: Check that if only searched once there is one, 2 then 2, 3 then 3, and when it reaches 4 make sure that the list updates when a new search			
		is made			
		Task 12: Check that when a city is clicked the info loads onto the same homepage and updates what			
		is currently there			
		Task 13: Check to make sure that when a new city is searched it replaces the oldest city, not the			
		newest			
	Task 14: Check that if you log in and favorite a bunch of cities, log out, and log back in again the same 4 are displayed				
	agent and anymyter	Took 15: Hole write more			
		Task 15: Help write more unit tests for better coverage			
	Task 16: Activity and Distance Sort				
Lauren					
		Task 1: Acceptance tests needed for all UI aspects	Task 2: Move the nav bar to the bottom of the page		
			on all pages Task 3: Remove the num results field from the		
		Task 4: Make sure that the UI is consistent on all	vacation and activity pages		
		pages	Task 5: Make sure that the analysis page is fully		
		Tank 6: Work with	functioning and has a consistent UI		
		Task 6: Work with satoshi to make sure that all the aspects of project 1 are included in project 2			
			Task 7: Update the column names on vacation planning and activity		
		Task 8: Make sure that the project runs and looks the same on multiple computers			
		Task 9: Make sure that there are adequate acceptance tests for all aspects of the project,			
		regardless of whether or not we have gained feedback			
			Task 10: Add UI for the search history section on the HomePage		
1			Task 11: Make sure that the homepage reflects which user is logged in.		
		Task 12: Make sure all ui resizes nicely, and update CSS files			
		Task 13: Delete Unneccessary branches and add			
	+	comments for readability			
Jung					
			Task 1: Change the "prev" and "next" buttons on		
			the vacation and activity pages to "Previous" and "Next" Task 2: For pagination, make ours to highlight the		
			Task 2: For pagination, make sure to highlight the current page that the user is on in the results section		
		Task 3: Help Implement the liking system. Since we	accurui		
Ì		were unable to gain feedback we will implement this to the best of our knowledge, and add acceptance tests to show how this works			
		Task 4: Add extensive acceptance tests based on			
		the acceptance test document Task 5: Help add the sorting functionality for likes.			
			Task 6: Center page numbers around the page you are on
